With endless
possibilities*

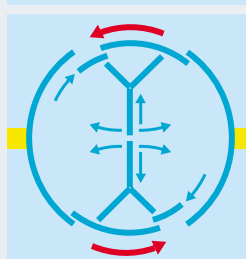

3-wing revolving doors

4-wing revolving doors

4-wing revolving doors
with showcase and nights slides

2-wing revolving doors
with safety wing, emergency
escape exit and showcase

REVOLVING

BLASI revolvers - everything is possible

Create an impact with BLASI automatic revolving doors.

In 2-wing, 3- or 4-wing versions, with or without showcase, night slides, integral emergency exit and a diameter up to 6 meters - everything is possible.

Technically advanced, with excellent quality and silent functioning, BLASI revolving doors are top class.

The different design possibilities are a challenge for planners and architects. Choice can be made between operators in the ceiling or invisible BLASI-SU underfloor operators, different powder coating or anodizing colours or manufacture in all-glass design for a special transparent look.

To facilitate access for handi-capped persons, BLASI revolving doors are provided with a control box to reduce rotating speed.

Their high safety standard is another example for all these automatic doors. BLASI revolving doors have officially TÜV approved emergency escape exits.

When are you going to plan with BLASI?

REVOLVING

Our aim is to create the entrance area that gives an excellent first impression.
