

PR 900

Description

The PR900 is a motorized flag shutter where the essence of raw materials such as steel and glass are shaped by the typical Italian style that makes it particularly elegant and at the same time secure for any entrance.

It may be used as an access control system alone or in combination with the PASS 107/PASS 107 LIGHT gates as an entrance for the disabled or for services, it also can be used for emergency in any direction. Realized by a cylindrical supporting structure that controls the glass shutter.

The glass shutters of the PR900 are custom-made and with a smoked finish (optional).

The PR 900 has the predisposition for future installations for identification systems such as badge reader, hands-free proximity, biometric and more.

The PR 900 can be installed in hotels, offices, airports, railway stations, hospitals, malls

Technical Features

Electrical System

Power supply: 220 V +/- 10%, 50 Hz.
Maximum power consumption: 400 W.
Operating temperature: -10°C to 55°C.
Motors: in direct current 24 Vcc.
Coating : Stainless steel AISI 304.

Dimensions

Glass height: 790 mm
Glass Width: 805 mm
Flag Shutter Height: 1000 mm
Flag Shutter Width: 957 mm
Weight: 50 Kg
